Answering the Mission 2030 Call to Action With the CRI Council's

MOBILE WASTE SAVER APP

A tool for all stakeholders to reduce waste and costs

Developed by the CRI Council leaders Alyssa Aiello, ACTT Installation, CSV Architects, Erskine Dredge Architects and RG Integration, with contributions from countless other professionals. The WASTE SAVER Mobile App will help designers, specifiers, contractors, facility managers and others, in CANADA and the UNITED STATES, to reduce their waste generation at all points through the project processes. This invaluable tool will allow users to easily...

- Find the nearest materials, recovery point such as Habitat for Humanity Restores, New West Gypsum Recycling, Tomlinson, Wasteco and many others
- Specify recovery of building materials, using NMS format
- Find Mission 2030 Supporters through a directory
- Find helpful hints and FAQ's

The beta version of the 'Waste Saver' Mobile APP is now available for free download to all i-phone and android users. This tool is also a great way for product and service providers to inform early decision makers how they can help in changing how industry views and deals with resources.

For details and costs on listing or partnership opportunities, visit http://www.cricouncil.com/?page_id=649; e-mail info@cricouncil.com or call 613-695-4632 Support and exposure opportunities are available
