

THE NEED FOR AN INTEGRATION PROTOCOL

Turning building industry demand and supply chains into value chains.

OUR DEVELOPMENT AND CHANGE MANAGEMENT SYSTEMS ARE UNTENABLE; TOO MANY RESOURCES ARE WASTED...

The Problem: Unresolved complex systemic organizational and operational problem root causes;

The Effects: Persistent inertia to real measurable and verifiable sustainable changes;

The Side-Effects: Countless negative rebound effects and conflicts to change efforts;

The Impacts: Social, economic, environmental development system chaos and living system depletion – leading to global warming.

THE MISSION 2030 PROTOCOL IS A LIVING SYSTEM SOLUTION

The Goal: Provide a clear set of industry guidelines that will produce a complete communication system, facilitating the co-creation of a lean fully integrated and sustainable development system: socially, environmentally and economically.

The Value: Continuous quality improvements in all resource efficiency and productivity

The Return on Investment : Value creation along the entire supply chains and complete capital growth.

The Urgent Need: Public-Private-Partnerships to be ratified in 2017, then consolidated...
